## SUMMARY

Final-year Software Engineering student passionate about Full-Stack Development, with strong front-end skills in JavaScript (React) and basic back-end experience using Node.js, .NET, and Spring Boot. Familiar with SQL databases through academic projects. Eager to apply theoretical knowledge and personal project experience to real-world development challenges, while continuously learning and improving back-end competencies.

---

## EDUCATION

### Bachelor of Information Technology (Expected 2026)

2021 - Expected 2026

Saigon University (Ho Chi Minh city)

- Specialization: Software Engineering
  - Currently in final year
- 

## SKILLS

### Front End Development:

- HTML5, CSS, JavaScript, TypeScript, ReactJS, TailwindCSS, NextJS

### Back End Development:

- C#, Java, SpringBoot, ASP .NET

### Web Services:

- REST/JSON, Postman, Web API

### Version Control Tools:

- Github

### RDBMS:

- MySQL
- 

## PROJECTS

### 3D portfolio

Personal Project | March, 2025 - March, 2025

A responsive 3D portfolio built with Three.js and Vite, featuring interactive models and smooth animations. Styled with TailwindCSS for a clean UI.

Skills: Three.js, JavaScript, Vite, TailwindCSS, HTML5

## **Social Media Server (Instagram Clone)**

Team Project | Sept, 2024 - Dec, 2024

Developed a scalable backend service for an Instagram-inspired platform using C#, ASP.NET Core, and SQL Server. Implemented core social features including user authentication (JWT), post management with Cloudinary media storage, engagement systems (likes/comments), and real-time messaging. The architecture demonstrates RESTful API design principles, efficient database modeling with Entity Framework Core, and secure file handling - showcasing practical .NET backend development skills in a social media context.

Core Responsibility: Developed core messaging APIs with media support for an Instagram-like platform, featuring real-time communication and cloud file storage.

Skills: C#, ASP.NET, Cloudinary, WebSocket
